

THE DIRT!

SOILBIOTICS COMPANY E-NEWSLETTER

May 2017

Take Advantage of the SoilBiotics Tonnage Rebate Program

SoilBiotics is pleased to announce a 2017 Tonnage Rebate Program for our valued customers.

The new 2017 Tonnage Rebate will apply on any one product of the following: **Organic 2r - Soil Boost**, or **Organic Plant Boost**

- must be full pallets of 50# bagged material or bulk bags
- rebate qualification levels of 200, 300, 400 and 500 tons of single product

Total tonnage must be ordered, shipped and paid for within calendar year. Please contact the SoilBiotics office for details.

Some Post-Emergence Recommendations

For Enhanced Growth and Plant Vigor

Depending on your program, (Conventional vs. Organic) foliar apply per acre either **3 - Growth Boost** or **Organic 3r – Growth Boost** at 1 gallon and **SB4400** at ½ pint at V-2 to V-3 with 10 to 20 gallons water.

Post-Emergence Herbicide

In conventional programs, foliar apply per acre **5 - MicroNutrient Boost** at 1 pint to 1 quart, **6 - Growth Supplement** at 1 pint to 1 quart, **SB4400** at ½ pint, and **Growth Supplement 30** at 8 ounces to 1 pint with post-emergence herbicide applications to improve herbicide effectiveness and stimulate seedling growth.

The 4r Nutrient Stewardship Program

SoilBiotics is a proud partner and supporter of the 4r Nutrient Stewardship Program. Here are some benefits of the program:

4R nutrient stewardship can help **improve agricultural productivity**:

- Optimizing nutrient management can help in dealing fluctuations in prices of fertilizers and other inputs
- Higher crop yields are well documented with better crop and soil management
- Improved fertilizer efficiency increases the quantity produced per acre for each unit of nutrient applied, without sacrificing yield potential

4R nutrient stewardship can help **minimize impact to the environment**:

- Adopting nutrient stewardship contributes to the preservation of natural ecosystems by growing more on less land
- Retaining nutrients within a field's boundaries and in the crop rooting zone greatly reduces the amount that is not utilized by plants and thereby escapes into the environment as pollution

As you "take-the-field" this spring and summer, please take time to peruse their website and see how they can help you advance your dedication as a steward of the land. <http://www.nutrientstewardship.com/>.
